Principal

Education is the all-round development of a child — body, mind & soul. Education teaches how to think, not what to think. Once a pupil's mind gets enlightened, it can't move back to darkness. Confucius said: "It does not matter how slowly you go as long as you do not stop." A child can pick up his own pace: walking steadily towards the light of education, led by the teachers. As the leader of the team, I mentor my teachers to build bridges with their students, to help them cultivate minds, & to transmit civilization and disseminate culture.

The principal of a school strives to transform academic vision to reality, empowers the teachers to become change agents, & introduces & nourishes passion into his team. The people with strong purpose in life, don't need to be pushed. Their passions will drive them to their goals. The job of a School Principal isn't merely a job. It's an opportunity to share & harness courage, shape futures, empower new leaders to transform the world, & foster creativity & imagination in the minds & hearts of the students & teachers. As Martin Luther King Jr. said once: "The function of education is to teach one to think intensively and to think critically. Intelligence plus character - that is the goal of true education." As the School Principal, I endeavour to turn my teachers & pupils into humans with empathy, intelligence & strong moral fabric.

The great American poet Maya Angelou said: "I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel." To make my teachers feel empowered is my prime purpose. To make my students feel enlightened is my supreme responsibility. To help my organization soar to the heights of academic excellence is my ultimate goal.

Dance

When both mental fitness and physical exercise come together there can be lots of fun, so parents can encourage their children to take an active interest in such activities.

Skating

Skating for kids can be a fun and rewarding activity for kids of all ages! It builds strength, balance, and coordination while also providing a great source of exercise. Skating is a great way to spend time with friends or family, and it's a sport that can be enjoyed year-round. There are many benefits to skating for kids. Skating can help improve a child's balance and coordination. It is also a great source of exercise, burning calories and improving cardiovascular health. Skating can also help build muscle strength and flexibility.

Archery in the Schools is an alternative to traditional physical education that can be enjoyed by both boys and girls, regardless of athletic ability.
